

## **Occupational health Services**

**Occupational health** deals with all aspects of health and safety in the workplace and has a strong focus on primary prevention of hazards. The health of the workers has several determinants, including risk factors at the workplace leading to cancers, accidents, musculoskeletal diseases, respiratory diseases, hearing loss, circulatory diseases, stress related disorders and communicable diseases and others.

Employment and working conditions in the formal or informal economy embrace other important determinants, including, working hours, salary, workplace policies concerning maternity leave, health promotion and protection provisions, etc.

### **Occupational Health Program Services Offered:**

1. Health risk appraisal and assessments for research animal work and identified lab safety programs and other university programs that involve higher risk work and activities
2. Health risk counseling for allergies, ergonomics, reproductive, and immune status issues that may impact your job functions
3. Medical clearance and fit testing for job required respiratory protection
4. Job specific TB screening
5. Job specific vaccinations and titers
6. Job specific drug testing
7. Treatment of minor work-related injuries and illnesses
8. Case management for complex work-related injuries and illnesses including post-exposure follow-up
9. Fitness for duty consultations where a medical condition may present a serious safety risk
