Course Assessment for Semester System (100%)	Theoretical Content Exam	Clinical evaluation	Quizzes	Final Clinical Exam	Final Theory Exam
	15%	20%	5%	20%	40%
				Total point	100%

Course Description: This course is designed to arm you with the basic knowledge & expertise, which are required to be able to provide a competent care in the specialty of an adult nursing. Including however not limited to describing the basic concepts of the nursing process in adult nursing, levels of prevention, the most common medical-surgical cases along with their management.

Prerequisite courses: Fundamentals of Nursing I &II

Teaching Methods: Lecture, discussion/seminar, audiovisuals, handouts, assignments, group work, projects, student presentations, and more.

Evaluation Methods: Active participation, presentations, written assignments, exams, designing nursing care plans and more.

Required Textbooks:

- 1- Smeltzer, S., Bare, B., Hinkle, J., & Cheever, K. (2018). *Textbook of medical surgical nursing Brunner and Suddarth*. China.: Lippincott Williams and Wilkins.14th ed
- 2- Williams, L. S., & Hopper, P. D. (2015). *Understanding medical surgical nursing*. California: FA Davis.

Course Learning Objectives (theory and clinical)

By the completion of this course the student will be able to:

1. Appraise different diagnostic tests and procedures related to the covered medical-surgical cases
2. Evaluate the effect of the covered medical-surgical cases on the client, family, & the community
3. Appraise adult nursing role in promoting wellness and self-care for patients with the covered medical-surgical cases
4. Analyze the effectiveness of clinical judgments utilizing critical thinking skills concerning the covered medical-surgical cases
5. Recognize the essential role of the adult nurse in the primary, secondary, & tertiary levels of prevention

Academic Rules: Please see the updated Student Affairs Controls Guide on the college's official website.
